

sancturm

The Guide

What it does, how to use it, and exactly what students, CRs, and the admin can each do.

01 Student **02** CR **03** Controller

CSE CORE · CSE AIML · CSE AIDS

Browse, download, share. No login.

Open the site, pick your branch, done. Everything below is available instantly — nothing here needs an account.

- 1 Open Sancturm → watch the short intro → pick your branch (AIML / Core / AIDS).
- 2 Your branch is remembered on that device — you won't be asked again.
- 3 Navigate with the sidebar (hamburger menu on mobile): Notes & Lab, PYQs, Notices, Sancturm Updates.

• What's in each section

- **Notes & Lab** — your branch only. Tabs for Notes vs Lab, filter by subject, sort newest/oldest, filter by date.
- **PYQs** — shared across all 3 branches, since most core subjects overlap.
- **Notices** — official announcements from your branch's CR.
- **Sancturm Updates** — platform-wide announcements from the admin.

• What you can do with any item

- **Search** — by title, subject, or date, in one search box.
- **View** — opens an in-app preview, no download needed.
- **Download** — saves the file to your device.
- **Share** — opens your phone's native share sheet (WhatsApp, Mail, etc.), or copies a link on desktop.

Note: Students can't upload anything — every item comes directly from a verified CR or admin, so there's no approval queue to wait on and nothing untrustworthy in the list.

Publish directly. It's live instantly.

Log in at `/login` with the email and password given to you by the admin. Nothing you publish waits for approval.

• Your scope

CONTENT	YOU CONTROL
Notes & Lab manuals	Your branch only
PYQs	Any branch — shared campus-wide, so you can help every branch, not just yours
Notices	Your branch only
Sancturm Updates	Admin-only — not visible to CRs

• Publishing

- 1 **CR dashboard** → **Upload directly** → pick the type (Notes / Lab / PYQ / Notice).
- 2 Choose **Upload PDF** (attach a file) or **Write custom** (type it directly — no file needed).
- 3 Title it, pick a subject if relevant, publish. Live immediately.

• Managing what's live

- **CR dashboard** → **Manage** — everything currently live in your scope.
- **Pin** anything to the top (exam-week notice, a key PYQ).
- **Delete** removes it everywhere — including the file itself, not just the listing.

Two CRs, one scope: each branch has a boys' CR and a girls' CR — both have identical powers for that branch. Either one can publish, pin, or delete anything in it; there's no split between the two.

- **What the admin has, on top of CR powers**

- **Every branch at once** — Manage shows all 3 branches in one list, not just one.
- **Publish to all branches** — one toggle publishes a Notes/Lab item to all 3 branches in a single action.
- **Sancturm Updates** — the only role that can post platform-wide announcements.
- **Delete anything, anywhere** — not scoped to a single branch.
